ATOMNIA®
Connected Cyber Resilience

Secure people, places, devices and operations
Connect everything. Stay connected. Full encryption
Total visibility. Always up to date. Re-tech Guarantee

Winners of Belgium Defence Institute's START2Def **award for Best Solution to Protect Critical Infrastructure 2026** and **CAP4LAND 2026**

"Belgian innovation that will soon be making a global impact"
Theo Francken – Minister of Defence & Foreign Trade

CONNECTED CYBER RESILIENCE for CONSTRUCTION

Failover faster. Block more threats. See everything. Stay operational.

THE CHALLENGE: WHEN CONNECTIVITY FAILS, CONSTRUCTION STOPS

Construction now runs on data as much as concrete and steel. BIM models, ERP systems, drawings, project schedules, IoT-enabled equipment, subcontractor portals and remote site connectivity must be available all the time. The pace of work, the number of partners and value of project information make construction companies a target for ransomware attacks and data theft.

NIS2, CRA and the UK's CRB compliance regulations, critical infrastructure requirements and stricter client security clauses mean firms must prove resilience, secure their supply chains and keep projects operational. Fragmented solutions can cause blind spots, create vulnerabilities and increase resolution time, often needing specialist teams to manage each solution.

THE SOLUTION: OMNIA

OMNIA's Connected Cyber Resilience ensures your teams, sites, digital infrastructure, applications, IoT devices and supply chains are always connected and protected and always visible - one solution, one intelligent device, fully managed and supported by experts 24/7 making sure you stay operational, even when things go wrong. Available with flexible contract terms, low-to-no upfront costs and no lock-in contract options so resources stay focused on project delivery, productivity, compliance and margin.

OMNIA seamlessly integrates world-leading technologies with ATOMNIA's own proven and advanced innovative technologies. It's modular and scalable, enabling you to choose the components you need now, then add more later.

OMNIA's MEASURABLE BENEFITS: Proven. Trusted. Integrated. Project Ready.

Threat Intelligence
Real-time insights for faster decision-making

Detection Analytics
AI-driven anomaly detection, response & remediation

Best Block Rates
99.9% malware + 100% phishing & ransomware block rates

Always-on Networks
Failover in under 0.3seconds for continual connectivity

Secure Data Control
Protect all your data, everywhere

Future-Ready
Re-tech guarantee and continuous updates

PROJECT AREAS OMNIA SUPPORTS:

- **Local, regional & international sites**
- **Apps, voice, video & data**
- **Supply chains**
- **Plant, IoT & equipment**
- **Greenfield & established Sites**
- **Remote teams**

WHY ATOMNIA:

- The only company globally with 2 x double-accredited SD-WAN Subject Matter Experts
- Winners of **Start2Def** (Belgian Defence Institute) Best Solution to Protect Critical Infrastructure 2026 and **CAP4Land** 2026
- Bespoke solutions can be developed in-house with quick turnaround
- World-leading technologies seamlessly integrated & supported 24/7, enabling vendors to be replaced without replacing the entire solution

ASK US ABOUT:

- ✓ Resilient, secure, always-on connectivity & cyber command platform
- ✓ Always up-to-date asset management registry
- ✓ Defensive-grade Layer 4 voice, video and data encryption
- ✓ Seamless integration with existing solutions
- ✓ Secure IoT connectivity & telematic data
- ✓ Built for multi-site, remote and fast-changing construction environments

Cybersecurity is no longer enough. Connected Cyber Resilience is the logical step.

ONE integrated solution. ONE intelligent device. ZERO compromise
