ATOMNIA®
Connected Cyber Resilience

Secure people, places, devices and operations
Connect everything. Stay connected. Full encryption
Total visibility. Always up to date. Re-tech Guarantee

Winners of Belgium Defence Institute's START2Def **award for Best Solution to Protect Critical Infrastructure 2026** and **CAP4LAND 2026**

CONNECTED CYBER RESILIENCE
for MANUFACTURING and SUPPLY CHAINS

"Belgian innovation that will soon be making a global impact"

Theo Francken – Minister of Defence & Foreign Trade

Failover faster. Block more threats. See everything. Stay operational.

THE CHALLENGE: MANUFACTURING CANNOT AFFORD OPERATIONAL DISRUPTION

Manufacturing depends on always-connected production lines, OT/IT systems, IoT, MES, ERP, robotics, suppliers and remote sites. A network failure, ransomware attack or compromised connection can stop production, disrupt logistics, expose IP and create costly supply-chain delays.

OT/IT convergence and increasingly connected plants expand the attack surface, while supply-chain dependencies amplify the impact of disruption. Manufacturers need proven cyber resilience that protects production, data and connected operations, **because downtime is not an option**.

THE SOLUTION: OMNIA KEEP PRODUCTION CONNECTED, PROTECTED & RUNNING

OMNIA's Connected Cyber Resilience connects and protects plants, people, machines, suppliers and remote operations in one intelligent platform. When connectivity fails or a threat emerges, OMNIA automatically maintains available communications, detects anomalies and helps contain disruption before it impacts production. Resilient multi-link connectivity keeps critical operations online. Integrated protection, encryption and visibility help safeguard OT, IT and sensitive data. AI-enhanced Cyber Command gives operators a single view across plants, OT, IT and connected assets, while defence-grade Layer 4 encryption protects data in transit. Sovereign infrastructure and 24/7 managed support **help keep production running**, protect supply-chain continuity and scale securely across every site.

OMNIA's MEASURABLE BENEFITS: Proven. Trusted. Integrated. Resilience-Ready.

Threat Intelligence
Real-time insights for faster operational decisions

Detection Analytics
AI-driven anomaly detection, response & remediation

Best Block Rates
99.9% malware & 100% Phishing & ransomware block rates

Always-on Operations
Uses all available connectivity simultaneously with failover in 0.3 seconds

Secure IoT & Data
Protect IP, production data & connected assets

Continuous Resilience
Monitor, adapt, improve – always operational

WHO OMNIA IS FOR:

- Factories & plants
- Warehouses
- Production lines
- IoT assets & OT environments
- Supply chains
- Remote operations

WHY ATOMNIA:

- The only company globally with 2 x double-accredited SD-WAN Subject Matter Experts
- Winners of **Start2Def** (Belgian Defence Institute) Best Solution to Protect Critical Infrastructure 2026 and **CAP4Land** 2026
- Bespoke solutions can be developed in-house with quick turnaround
- World-leading technologies seamlessly integrated, then managed & supported 24/7, enabling vendors to be replaced without replacing the entire solution

ASK US ABOUT:

- ✓ Resilient, secure, always-on connectivity for plants, warehouses and office locations
- ✓ IoT & OT segmentation and security
- ✓ Defence-grade Layer 4 voice, video and data encryption
- ✓ Zero-trust, secure remote access
- ✓ Re-tech guarantee and continuous updates
- ✓ AI-driven cyber command platform
- ✓ Always up-to-date asset register

Cybersecurity is no longer enough. Connected Cyber Resilience is the logical step.
ONE integrated solution. ONE intelligent device. ZERO compromise
