ATOMNIA®
Connected Cyber Resilience

OMNIA CYBER COMMAND PLATFORM

Powered by ARMADA

Built For Today's Threats and Tomorrow's Scale

OMNIA CYBER COMMAND PLATFORM connects telemetry, XDR analytics, governed AI, response, workflows, vulnerability intelligence and verified evidence into one operational platform.

A complete command platform for Connected Cyber Resilience

Unified operations | **Governed AI** | **Controlled response** | **Verified evidence**

01 | THE CHALLENGE

Security operations are too fragmented.

- Signals, alerts and evidence spread across disconnected tools
- Too much noise makes priority threats harder to identify
- Manual hand-offs delay investigations and response
- AI and automation need controls, accountability and auditability

More signals. More noise. Slower action.

02 | THE SOLUTION

OMNIA Cyber Command Platform: One operational picture. Controlled action.

A single security operations environment for secure telemetry, detection, correlation, investigation, governed response, intelligence and reporting.

03 | WHAT IT UNIFIES

Every signal. Every decision. One platform.

Secure telemetry	XDR analytics	Alerts & priorities	Incidents & cases
AI command	Vulnerability intel	Threat intel	Reporting

04 | BUSINESS IMPACT

From alert noise to governed action.

Detect Earlier
Connect related events and behaviour

Prioritise Smarter
Focus attention on meaningful threats

Respond Faster
Move through structured, controlled workflows

Assure Resilience
Maintain Auditability, evidence & compliance outputs for complete governance

05 | HOW IT WORKS

Detect. Correlate. Decide. Respond. Improve.

Detect	Correlate	Decide	Respond	Improve
Collect signals	Connect context	Prioritise risk	Govern actions	Report & learn

06 | KEY FEATURES

Cyber operations. Built for control and scale.

- Secure telemetry collection and normalisation using CCSF
- Rules, detection and event correlation
- Alerts, priorities and incident management
- Case workflows with notes, tasks and evidence
- AI-assisted analytics and recommendations
- Governed actions with identity and policy controls
- Vulnerability tracking and approved target scanning
- Threat intelligence and indicators of compromise
- Reporting, evidence and compliance outputs
- Scalable Kubernetes-based platform foundation

07 | WHY ATOMNIA:

Trusted & proven expertise.

The only company globally with 2 x double-accredited SD-WAN Subject Matter Experts

ATOMNIA-developed pure-play packet-based SD-WAN

EU SEAL-3 sovereign technology with global design, integration, deployment, management & 24/7/365 support

Flexible solution & terms, eliminates lock-ins

Multi-award-winners for Defence projects **START2Def 2026** & **CAP4Land 2026**

08 | LET'S CONNECT

Are You Ready to take command of your cyber resilience?

Create a clearer operational picture and a more controlled path from telemetry to decision, detection to response

Talk to us – we're here to help
